MCSA Guide to
Administering
Microsoft® Windows
Server® 2012/R2

Exam #70-411

MCSE
MCSA

Greg Tomsho

Chapter 6
Network Policy Configuration

Activity Known Issues

Lab	Issues
6-2	p. 219, Step 1. You need to log on to the domain as Administrator, not using the local Administrator account. Domain credentials are needed to add 411Server2 to the RAS and IAS Servers group.
6-3	p. 224, Step 15 *Reads:* "On 411Server1, create a VPN client and connect it to 411Server2." *Should read:* "Start 411Win8, log on, and create a VPN client and connect it to 411Server2." *Reads:* "Log on as Administrator…" *Should read:* "Log on to the domain as Administrator (411dom1\Administrator)…" In addition, you need to enable MS-CHAP v2 authentication on the VPN client on 411Win8.
6-4	p. 226, Step 9. See note above about Activity 6-3, Step 15. Be sure to use 411Win8 as the VPN client.
6-5	p. 227, Step 6. See note above about Activity 6-3, Step 15. Be sure to use 411Win8 as the VPN client.
6-12	p. 246, Step 7: You should log on to 411Server2 as Administrator before opening a command prompt (elevated command prompt not necessary) and running gpupdate. (Hat tip: Mario Covelski)
