

If you have errata to contribute, please send me an email at books@tomsho.com

Page	Location	Description	Explanation
Introduction			
xxi	Top of page, 411Server2 configuration	<i>Reads:</i> IPv4 address: 10.11.1.1/16 <i>Should read:</i> IPv4 address: 10.11.1.2/16	The address 10.11.1.1/16 is the address of 411Server1 so it must be 10.11.1.2 so as not to conflict.
xxiii	Bottom of page	<i>Reads:</i> Web site: http://books.tomsho.com <i>Should read:</i> Web site: http://books.tomsho.com	An extra 't' in http
Chapter 1			
39	Under Configuring DHCP for WDS	<i>Reads:</i> DHCP is on a different server or a different subnet. <i>Should read:</i> DHCP is on a different server on a different subnet.	
Chapter 2			
72	Step 3 at the bottom of the page.	<i>Reads:</i> wsusutil movecontent D:\WSUScontent <i>Should read:</i> wsusutil movecontent D:\WSUScontent D:\WSUScontent\move\log.log	You must specify the path to a log file in the command.
Chapter 3			
102	Activity 3-6, Step 13	<i>Reads:</i> "You should see the warning event with event ID 1232 4 ..." <i>Should read:</i> "You should see the warning event with event ID 1232 5 ..."	The incorrect event ID was specified. (Hat tip: Dwight Watt)
126	Review Question # 19	The solutions file includes answers a. , c. , and d. The correct answer should be a. , d.	Answer c. Folder names is not a correct answer.
Chapter 5			
181	Step 4	<i>Reads:</i> "On 411Win8, log on to the domain as Administrator " <i>Should read:</i> "On 411Win8, log on as Win8User "	The domain controller is not currently running so you need to log on with a local user account. (Hat tip: Mario Covelski)
181	Step 8	<i>Reads:</i> ...which should be 10.11.0.100." <i>Should read:</i> "...which should be 10.11.0.101."	The address assigned to the client is 101 because 100 is assigned to the server PPP adapter. (Hat tip: Mario Covelski)
Chapter 6			
219	Step 1	<i>Reads:</i> "...and log on as Administrator." <i>Should read:</i> "...and log on to the domain as Administrator."	A domain administrator account is required to add the server to the RAS and IAS Servers group.
224	Step 15	<i>Reads:</i> " On 411Server1 , create a VPN client and connect it to	411Win8 should be the VPN client, not 411Server1. Make sure to logon to the VPN

Errata File for MCSA Guide to Administering Windows Server 2012/R2, Exam 70-411

		<p>411Server2." <i>Should read:</i> "Start 411Win8, log on, and create a VPN client and connect it to 411Server2." <i>Reads:</i> "Log on as Administrator..." <i>Should read:</i> "Log on to the domain as Administrator (411dom1\Administrator)..." (Hat tip: Randy Seals)</p>	<p>using domain credentials (411dom1\administrator) In addition, you need to enable MS-CHAP v2 authentication on the VPN client on 411Win8.</p>
226	Step 9	<p>See note above regarding Activity 6-3, Step 15. You should connect using 411Win8, not 411Server1. Also, logon using 411dom1\Administrator.</p>	
227	Step 6	<p>See note above regarding Activity 6-3, Step 15. You should connect using 411Win8, not 411Server1. Also, logon using 411dom1\Administrator.</p>	
246	Step 7 from Activity 6-12	<p>Change the order of sentences 1 and 2.</p>	<p>You need to log on to 411Server2 and then run gpupdate. Also, gpupdate does not require an elevated command prompt. A regular command prompt is sufficient. (Hat tip: Mario Covelski)</p>
Chapter 7			
276	Activity 7-5, Step 6	<p><i>Reads:</i> When you're prompted for credentials, type administrator and Password01. <i>Should read:</i> When you're prompted for credentials, type 411Dom1administrator and Password01.</p>	<p>If you do not enter the domain name as part of the credentials, the step will hang and you will need to follow steps detailed at: https://support.microsoft.com/en-us/kb/2737935</p>
273	Under Domain Naming Maser, first sentence	<p><i>Reads:</i> The domain naming master is needed when a domain or DC is added or removed from the forest. <i>Should read:</i> The domain naming master is needed when a domain is added or removed from the forest.</p>	<p>The domain naming master is not required when a DC is added to an existing domain but the RID master is required so the new DC can get an RID pool.</p>
Chapter 8			
300	Step 10	<p>Two occurrences of testout1 should be testou1.</p>	<p>(Hat tip: Dwight Watt)</p>
317	Step 2	<p><i>The cmdlet reads:</i> Add-ADComputerServiceAccount - Identity ldsServ1 -ServiceAccount LDAPSvc <i>Should read:</i> Add-ADComputerServiceAccount - Computer ldsServ1 -ServiceAccount LDAPSvc</p>	
Chapter 11			

Errata File for MCSA Guide to Administering Windows Server 2012/R2, Exam 70-411

409	Activity 11-1	<i>Add a note under the activity title:</i> Note: Before beginning Chapter 11 activities, remove 411Server2 from the domain and uninstall AD DS and DNS.	411Server2 is still a member of the domain from Chapter 7 activities and still has DNS installed. You need to remove it from the domain and uninstall Active Directory and DNS before starting these activities.
